EXPERIENCE

SMARTCHARTS LTD   JUN 2020 - 2024

Web Developer - Remote

- Develop responsive web pages using frameworks like React, Angular, or Vue.js.
- Architect and implement the server-side logic, ensuring the seamless development and integration of robust back-end functionalities for optimal performance and functionality in web applications.
- Develop and sustain additional features for current websites.

VISAYAS STATE UNIVERSITY   AUG 2017 - 2020

Computer Programmer II

- Strategize and execute the development of a web application tailored for a Supply and Procurement System within the university environment. Employ Vue.js and Laravel to seamlessly integrate advanced functionalities, ensuring a robust and efficient system to meet the specific needs of the university's procurement processes.

AZTEC BPO   FEB 2015 - 2017

Web Developer/Designer

- Generate innovative ideas and insights to enhance the usability of our web tools. Coordinate the analysis, design, implementation, and testing phases for a substantial software system.
- Customizing WordPress themes and plugins to align with specific client requirements, ensuring a tailored and responsive web solution.
- Incorporated user-facing elements crafted by front-end developers with server-side logic.
- Enhanced the application for optimal speed and scalability.

AUTHOR SOLUTIONS LLC (formerly Xlibris)   NOV 2012 - 2015

Web and graphics designer

- Design web layouts and templates for user-friendly experiences. Create visuals for print, social media, and branding materials. Collaborate across teams and maintain consistent branding, including captivating book cover designs.

AFFILIATED COMPUTER SERVICES   AUG 2010 - 2012

Transaction Processor

- Perform accurate data entry from blueprints. Organize and categorize data for easy retrieval. Maintain databases by updating and correcting errors.
